
(a) Non-linear book (put 97% strike, 1 month)
linear book
basket + short put
one-day P&L (%)
basket return (%)
(b) PINN vs exact density, every test day
linear book
nonlinear book
ES99: PINN / exact − 1 (%)
(c) Distribution over days
linear: median 0.21%
nonlinear: median 0.24%
fraction of test days
|ES99 PINN / exact − 1| (%)
